EDUCATION

University of Wisconsin-Madison | *BS in Computer Science & Data Science* Madison, WI, Expected May 2028

- **Minor:** Business **Coursework:** Discrete Math, Java, Computer Engineering, Linear Algebra
- **Awards:** 2nd Place BadgerAI Hackathon, GHC 2026 Scholarship, NCPA Academic All-State

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Go, SQL, HTML/CSS
Frameworks & Libraries: React, Node.js, Express, REST APIs, Socket.IO, Unity
Cloud & Data: AWS, Firebase, Supabase, PostgreSQL, MongoDB
Tools & APIs: Git, GitHub, Claude API, OpenAI GPT-4o Vision, Deepgram, ElevenLabs, MCP, Docker, Agile
Concepts: Data Structures & Algorithms, Object-Oriented Design, Distributed Systems

EXPERIENCE

AI/Technical Builder | *UW-Madison Tech Exploration Lab* Madison, WI, Jan. 2026 – Present

- Improved veterinary intent/keyterm recognition from 62% to 81% in internal evaluation by engineering domain-specific keyterm boosting for a distributed, bilingual (EN-ES) voice agent built in Go with Deepgram Nova-3 ASR and ElevenLabs TTS across 7 partner farms
- Tested and refined the ASR pipeline across 3 Spanish dialect variants using ~30 livestock call transcripts, reducing misrecognized veterinary/farm keyterms from 4 to 1-2 per transcript

Tech Fellow | *CodePath* Remote, May 2026 – Present

- Mentored 300+ students across weekly technical interview prep sessions, increasing successful full mock-interview completions from ~55 to ~150 students and raising average HackerRank scores from 40% to 70% over 10 weeks

Software Developer Intern | *University of Nebraska-Omaha* Omaha, NE, May 2024 – Aug. 2024

- Implemented diamond-square terrain generation in Unity, producing 2049×2049 heightmaps (4M+ elevation samples) across a 16×16 rover map with 6+ lithology types, replacing manual terrain design for repeatable tests
- Served as GitHub integration lead across 10 sprints, consolidating work from 3+ contributors and 4 merged PRs, resolving Unity script/asset conflicts to maintain a stable main build for weekly rover navigation testing

PROJECTS

VitalLens – 2nd Place, BadgerAI | *React, TypeScript, Supabase, Claude API* April 2025

- Built AI health dashboard parsing all biomarkers from uploaded PDF lab reports via the Claude REST API, returning personalized explanations in ~3 seconds for 50+ users
- Integrated Supabase (Postgres + RLS) and Edge Functions for auth/data persistence; built longitudinal biomarker trend charts and AI-generated doctor-prep questions

Ripple | *React, TypeScript, Node.js/Express, Firebase, Socket.IO* November 2025

- Built a real-time distributed proximity-based networking app using React, Firebase, and Socket.IO during a 48-hour hackathon, exposing a Node.js/Express REST API and supporting attendee discovery via same-event rooms with 1.5s presence updates and sub-250ms detection latency

BluPrint | *React, OpenAI Vision (GPT-4o), Inline SVG, MongoDB* May 2026 – Present

- Built AI interior design app generating 3D room layouts across rooms with shoppable furniture; integrated GPT-4o Vision to extract 5-color palettes, mood tags, and room features for personalized styling

Clarity | *scikit-learn, ONNX, JavaScript, pandas, Chrome Extensions API* July 2026 – Present

- Engineered 7 NLP features from 500+ Wikipedia/news sentences to train a Random Forest achieving 87%+ validation accuracy, tuning hyperparameters across 7 tree depths to reduce train-validation gap from 18% to 4%

AWARDS, PROGRAMS & LEADERSHIP

Y Combinator Startup School 2026 July 2026

- Selected from a competitive pool (~7% acceptance rate) as a top technical student builder
- Awarded \$25K+ in AI compute credits; attending talks by Sam Altman, Jensen Huang, Alexandr Wang

Adobe Student Ambassador

- Promoting Adobe, engaging students through campus events, and creating awareness around creative technology

Outreach Lead - Google Developer Groups

- Bringing in sponsors for CheeseHacks (500+ participants), hosting workshops, leading outreach

Biweekly Lunch Chair, Women in ACM (UW-Madison)

- Lead biweekly lunches connecting 250+ members with faculty and industry; hosted 40+ member Google lunch

Certifications/Programs

- Machine Learning – Kaggle; MCP (Advanced) – Anthropic (2026); SCJohnson Summit; Liberty Mutual Summit
